

# Azure Machine Learning

## Service Description

- Azure Machine Learning is a service which enables build, train and deploy machine learning models.
- Supports for open-source frameworks and languages including MLflow, Kubeflow, ONNX, PyTorch, TensorFlow, Python and R

## Service Description

## KoçSistem Offerings

- Monitor service health and performance
- Service activation and configuration
- Scale up/down according to needs or define automation for scaling
- Manage Access Management and role definition
- Develop machine learning models according to needs
- Integrate with Azure data sources and publish reporting environments

## Benefits

Robust MLOps capabilities that help manage the complete ML life cycle

Interpretability to build reliable AI solutions

Innovate with business continuity

Operationalize at scale

## Use Cases

Energy demand forecast

Stock Optimization

Customer Churn Prediction

Credit Risk Assessment

Predictive Maintenance

## What are the benefits of KoçSistem Services?

- Fast and efficient processes in operational works
- Uninterrupted service
- Reducing the workload of IT teams
- Fast and efficient technology adaptation
- Avoid unforeseen interruptions
- Business Continuity

## Why KoçSistem?

- Expert technical team
- End-to-end service provider
- 18 years of managed services experience
