

At A Glance

Many businesses want to take advantage of the power of Microsoft Azure without the difficulty and expense of managing it on their own. Some businesses do not have the technical expertise or capacity to run their cloud infrastructure, tools, and applications. Others may have the ability, but choose to maintain focus on their core business. Many large businesses are on a multi-stage cloud journey that requires migration and management services to adapt to changing needs.

KoçSistem provides customized cloud service offerings to meet specific needs. These offerings provide the flexibility to change or grow your cloud services as your Azure needs change and to increase value by delivering essential services and support.

What is Azure Network Watcher?

Azure Network Watcher provides tools to monitor, diagnose, view metrics, and enable or disable logs for resources in an Azure virtual network. Network Watcher is designed to monitor and repair the network health of laaS (Infrastructure-as-a-Service) products which includes Virtual Machines, Virtual Networks, Application Gateways, Load balancers, etc. Note: It is not intended for and will not work for PaaSmonitoring or Web analytics.

Benefits

Remotely capture packet data for your virtual machines

Monitor your virtual machine network security using flow logs and security group view

Diagnose your VPN connectivity issues

What are the benefits of KoçSistem Services?
