KoçSistem Azure CDNand DNS Management and Consultancy Services

At A Glance

In online content delivery, user experience is everything. Azure Content Delivery Network (CDN) lets you reduce load times, save bandwidth, and speed responsiveness—whether you're developing or managing websites or mobile apps, or encoding and distributing streaming media, gaming software, firmware updates, or IoT endpoints.

KoçSistem makes it easy to transform your legacy network infrastructure to highly performed CDN structure. CDN have been able to keep pa with modern business expectations for increased agility and autonomy.

What is Azure CDN?

A content delivery network (CDN) is a distributed network of servers that can efficiently deliver web content to users. CDNs store cached content on edge servers in point-of-presence (POP) locations that are close to end users, to minimize latency.

What is Azure DNS?

The Domain Name System (DNS) is a hierarchical and decentralized naming system for computers, services, or other resources connected to the Internet or a private net.

Benefits

Lower Latency

CDN and DNS supports significantly reduced page load time of website. It lowers the latency the faster the packets of information are sent and received.

Decreased Network Load

Forwarding visitors to edge servers means balancing network load. Less network disruption outcomes in better user experience.

Reduced Cost

It's an economical way to enhance web performance across the globe in one simple platform. Also, the load of all traffic is not positioned on a single backbone, but it is distributed to edge servers. So, we can cut content delivery costs.

Increased Reliability

The objective of a CDN is to make everything faster by utilizing speeding up technology which further increases the stability, performance and reliability of all content within that system, resulting in better customer satisfaction.

Key Benefits of KoçSistem Services

• **The help you need, when you need it.**
When issues arise, we respond fast.
• **Expert assistance and advice.**
Benefit from our support engineers' expertise and years of experience.
• **Optimum performance and ROI.**
Run upgrades, patches and fixes easily and often so you always leverage the latest features and functionality.
• **Faster time-to-resolution.**
Stop fighting fires and get back to work with premium self-service
• **Assistance to your cloud journey.**
With the years of cloud and multi cloud service experience we assist to create cloud migration roadmap

Key Features of KoçSistem Services

• **Cross-channel access to support resources.**
Call or click to find the answers you need, fast with help de
• **Immediate upgrades and fixes**.
Access new upgrades, enhancements, patches and bug fixe they're published.
• **Remote problem analysis and assistance.**
Get expert help from our team of support engineers.
• **24/7 coverage for issues.**
When critical issues arise, get the support you need, no ma what time of day.
• **Enhanced support.** Designated support engineer familia your business and IT environment
• **Analysis, design and implementation**
Providing highly-customized recommendations, network architecture design and cloud implementation roadmap
• **Guidance and help to build business vision:**
On-site meetings to review business needs and IT results
